A SINE WAS EYEMAN

TOP SECRET

50X1

c. Recommend swath widths, resolutions, and beam depression angle for these applications.

You may wish to modify and/or add to these objectives. I therefore should like to review your evaluation plan shortly after the effort gets underway.

As soon as the team has been assembled, the chairman should contact Colonel Buzard of the NRO Staff, so that necessary arrangements can be completed for briefing the team on the system and the December mission, and providing the required material for evaluation.

50X1

The ad hoc team should schedule its activities so as to present a final report and briefing to me not later than 1 July 1965.

Signielia

Brockway McMillan Director National Reconnaissance Office

ac: Deputy Director, CIA
